THE INSURRECTION AGAINST THE U.S. GOVERNMENT

Dec 13 (IPS) -- By their activation of the "live" NATO maneuver Hilex-75 Vice President Nelson Rockefeller, Secretary of State Henry Kissinger and their co-conspirators this week launched an insurrection against the government of the United States. Faced with intensified strategic offensives on the part of the international communist leadership, the Rockefeller cabal will be forced to by the end of January to play Hilex to its endgame with an assassination of President Ford as the final trigger to a thermonuclear exchange between the U.S. and the Soviet Union.

The assassination of Ford is programmed to have both domestic and international consequences.

In the U.S., the control of the government, of the thermonuclear button and of the economy will be placed directly in the insurrectionists hands. The computer printout, according to our intelligence estimates, calls for the creation of a government of national unity totally controlled by Rockefeller and his immediate allies.

Similarly, within an international environment of military, economic and political provocations, the Rockefeller conspirators behind their facade of a national unity government, hope to terrorize the Soviet leadership into acceptance of a limited nuclear strike with a singleminded display of mad ruthlessness unparalleled in human history.

The current government of the U.S. stands opposed to this policy and hence the basis for the insurrections. The RAND printout for Hilex, however, does not conform to reality. According to the best estimates of non-Rockefeller, non-NATO-linked military experts, the Soviet Union will never accept the concept of limited tactical nuclear warfare proffered by former Defense Secretary James Schlesinger and others associated with the Rockefeller family. The Schlesinger doctrine cannot defend what the Soviets perceive to be their strategic interests. The Soviets have given to this effect over the last year.

The insane Rockefellers, have therefore embarked on a suicidal course. Neither Rockefeller nor Kissinger nor the members of Congress will succeed live to see a government of National Unity. If they succeed in their insurrection, play out the Hilex 75 scenario they will incinerate most of the globe.

The U.S. Labor Party with, the distribution of mass Psychological Inoculation Bulletins, has put all officials, employees and representatives of the government on notice: "It is the undeniable duty of the U.S. Congress in particular to protect the U.S. constitution by demanding the immediate and full disclosure of from all U.S. government agencies concerning their involvement in this so-called exercise."

Failure to take immediate and open action against Hilex-75 insurrection will make U.S. government personell liable not only under U.S. law, the Labor Party leaflet indicates, but also under the Nuremberg statutes concerning "crimes against humanity."

FORD OPPOSES THE SCHLESINGER DOCTRINE

On Dec.7, the Chicago Tribune leaked the contents of a memo written at some point during the last few weeks by President Ford. According to the Tribune, the President's memo "disputes the Schlesinger concept that nuclear war has become thinkable." It has reportedly been circulated internally throughout key sections of his administration.

This evidence validates the IPS analysis that the Nov. 2 "Halloween Massacre" that removed Schlesinger from office and attempted to strip Kissinger of his control over National Security operations was precipitated by an effort by Rockefeller, Kissinger-Schlesinger to move for the "button." Ford responded, principally by repudiating the so-called Schlesinger Doctrine and firing its author.

The current Hilex mobilization is thus seen as Rockefeller's treasonous response to the President: they have moved towards a "limited nuclear war confrontation in explicit defiance of the orders of the President of the United States.

WHITE HOUSE FROZEN OUT

Rockefeller and Kissinger have already effectively frozen the White House out of the Hilex operation. Calls on Dec.8 to three high level aides in various offices in the White House revealed that they had absolutely no knowledge of Hilex. These aides were subsequently unable to get any information of Hilex even after a routine check.

Similarly, regular military officials in dozens of Pentagon departments reached by IPS this week have also been kept in the dark. These men expressed shock over the extent of the Rockefellers conspiratorial activities.

THE INVISIBLE GOVERNMENT IN OPERATION

IPS learned this week that there are specific sections of the government bureaucracy who were both knowledgeable about Hilex and were standing by ready to participate.

According to an official in office of Industrial Resource Mobilization in the Commerce Department, the entire domestic Hilex operation in the U.S. is being operated out of a "cell" in the State department. The "cell" reportedly includes representatives of various Cabinet Departments including Commerce, Transportation and Labor as well as representatives from Arthur Burns' Federal Reserve Board.

Later in the week sources indicated that the broad range of international military and economic warfare deployments for Hilex are centralized under two State Department offices which report

directly to Assistant Secretary of State Arthur Hartman (a member of the highest level policy deliberation body of the supranational Rockefeller dollar empire, the Bilderberg group) and to Kissinger. The two bureaus, Regional Political and Economic Affairs (RPE), which coordinates with the Paris-based Organization for Economic Cooperation and Development (OECD), and the Regional Political and Military Affairs (RPM), which coordinates with the NATO direct the scenarios for a thermonuclear "second strike" on the soil of West Germany, control and disruption of world transportation, food control operations, energy hoaxes, etc.

* Sources report that so-called front office personnel in the State Department, responsible for these above mentioned areas of operation, have now been given the job of retailing various psychological warfare lines to foreign governments and other layers of the U.S. government bureaucracy. Kissinger operatives both inside and outside the "official" government structure meanwhile, feed the appropriate policy lines back into the State Department front office through special briefings etc.

The way this operation works in practice is best illustrated by the following: The OECD-sponsored International Maritime Consultative Organization, IMCO, is currently conspiring with various Rockefeller-controlled banks including Chase Manhattan, Morgan Guarantee and Citibank to put the entire world shipping trade under full State Department control (specifically by the RPE) during the course of an all-week shipowners meeting in London. As RPE initiates this takeover maneuver, RPM across the hall has put out the line that the Soviets plan to use ports in Angola to cut off shipments of oil supplies to the U.S. and Europe.

A leading banker confirmed this week that the London conference is directly linked to the RPM initiated hysteria over Soviet Naval power - - a line which emanated from the NATO military Committee meeting in Brussels this week. He noted that the OECD, State Department operatives and the banks are discussing what he termed "war contingency plans."

This deployment is being backed up by "outside" men, most notably CIA thinktanker Marshall Goldman. Mr. Goldman accompanied by representatives of Chase and the CIA, will address a Tuesday morning State Department special staff briefing.

According to reliable sources, Goldman, whose proposals last August were the basis of the State Department's staff that shutoffs of Soviet grain shipments would force the Soviets to slaughter their herds of cattle, causing widespread social unrest. Goldman has also briefed AFL-CIO International Affairs Director Lee in Washington on his scenario-- an indication that the State Hilex "cell" will be going all out to push for a longshore boycott-embargo of the Soviet grain shipments....and so on.

In all of these comings and goings, the White House and the President of the United States play no-controlling role.

THE COUNTERATTACK

There are signs that anti-Rockefeller forces in the U.S. opposed to Hilex scenario are staging a counterattack.

In testimony yesterday before the Senate Commerce Committee, Secretary of State Robert Ingersoll, a member of the Chicago anti-Rockefeller, pro-detente industrialist's faction, denounced the idea

that in circulation that economic warfare could bend Soviet policy. On the contrary, Ingersoll pointed out, since the Soviet economy was created under conditions of economic blockade, such policies are futile.

Such statements which were backed up by Agriculture Secretary Earl Butz, are diametrically opposed to recent policy pronouncements made by his boss Secretary of State Kissinger at the Brussels NATO meeting. The Secretary repeatedly and emphatically called for economic warfare against the Soviets.

Ingersoll did not mention that such Hilex economic warfare strategies, while aimed nominally at the Soviet Union, are principally aimed at the nominal allies of the U.S.

Only the day before, Sen. John Culver speaking at the Chicago faction's public forum, the Chicago Council on Foreign Relations, (CFR) denounced "forces" obviously fitting the Rockefeller groups description, for threatening nuclear war. The military "cabal" is engaged, he said, in heating up hot spots around the world by feeding guns, arms, etc. to both sides -- one side, for example through the U.S. and the other through its "allies" like Great Britain. Culver linked this policy with the rise of international terrorism, citing the CIA's well-known assassination capability. "With these people around, who knows where the next assassin's bullet will land?" he asked.

He warned the CFR and groups like it not to fall for "such Red Scare nonsense" as "Soviet military buildup," saying that U.S. national security-military personnel "have worked out intricate scenarios for defeating the Soviet Union in a conflict" that are not only ridiculous from the standpoint of actual military strategy but also dangerous. He also said that Congress cannot be counted on to stop this scenario because of their vulnerability to arm-twisting and pressure by the "cabal." Culver, said that he hoped that he himself wouldn't be swayed because as long as "these same people" remain in control, the danger of nuclear war would persist. In the question period, Culver told the audience that he was aware of Hilex and pledged to force a Congressional investigation.

Behind this motion on the surface, Labor Party briefing calls on Capitol Hill have shown a tremendous fighting potential. Yesterday alone, more than 40 such calls received a positive response from Congressmen or the staffs.

WATERGATE WITH A DIFFERENT ENDING

Since at least last Sunday night, the Rockefeller controlled media has been engaged in a massive black propaganda operation directed against President Ford. Sunday's CBS national news portrayed Ford as a jet-setting yachting freak, featuring pictures of him dancing a tango. The President was described as a veritable Nero, fiddling while the world collapses into crises which he can neither control nor comprehend.

On Tuesday, the New York Post featured an unprecedented third page slander on Ford which indicated that people have suddenly discovered that the President has severe drinking problems. This story, originally conducted over a network morning television show by notorious CIA linked right-wing columnist Jeffrey St. John, was presented as "fact" although there was substantiating evidence other than hearsay.

The implications of such reports of a bumbling, drunken Pres-

ident were drawn out very clearly by a CBS Sunday documentary on the Assassination of President Kennedy. The program featured an interview with a psychologically broken former Secret Service agent who had been with Kennedy in Dallas, who babbled over and over "It is impossible to protect the president from an assassin's bullet."

SHORT TERM POLITICAL DESTABILIZATION OPERATIONS

Rockefeller linked forces also made a series of short term political moves this week aimed at destabilizing and demoralizing the President.

A report was "leaked" that the Republican National Committee had refused to turn over its fund raising lists to the President's election committee, because another Republican, such as Ronald Reagan, Sen. Charles Marthias (R-Fla) of Nelson Rockefeller may actually wind up with the Republican nomination!

Sources close to the Republican National Committee told IPS that the report, given widespread press coverage and originally circulated by the New York Times, was a deliberate fabrication. The Committee to Elect Ford had yet to make a request for such lists.

Rockefeller continued to order the release information that indicated Ford's campaign was collapsing. As Republican Southern National Committee delegates convened in Florida, Rockefeller family linked pollster George Gallup released figures showing a "dramatic turnaround" in the President's popularity among Republican's and independent's. According to the poll, which several Washington insiders immediately called a fake, conservative Rockefeller operative Ronald Reagan was now comfortably ahead of the President.

WILL THE REAL PRESIDENTIAL CANDIDATES PLEASE STEP FORWARD

IPS has learned that all of the current Republican and Democratic Party presidential candidates are being programmed and centrally controlled by the Hilex 75 command staff. The only candidate who is not so controlled is the Labor Party presidential candidate Lyndon H. LaRouche, Jr.

The Rockefeller forces exercise operational control over Birch Bayh, Fred Harris, Scoop Jackson, and Ronald Reagan, among others, through a centralized pool of advisors supplied by the Trilateral Commission and allied Rockefeller think tanks.

This fingertop control was tested last week when nearly all of the "candidates" simultaneously issued statements favoring "food control" as a political weapon.

Indiana Senator Birch Bayh, for example, is "advised" by a pool that includes Zbigniew Brzezinski, chairman of Rockefeller's Trilateral Commission, and Law Enforcement Assistance Administration founder James Vorenberg, according to several sources. Bayh's Washington office said that the "advisors" hold day-long "working sessions" with Bayh "every two or three weeks." Bayh told a state-wide convention of liberal Democrats in New York last weekend that he favors "the wielding of the U.S. food weapon."

Brzezinski also advises the campaign of Georgia Governor Jimmy Carter, along with other members of "a group of experienced foreign policy advisors" that includes Trilateral Commission members Richard Cooper, Richard Gardner, and George Ball, according to columnist Frank Starr of the Chicago Tribune. Carter's platform includes "fundamental propositions" to meet "a new oil embargo with a corresponding embargo of all exports to oil-producing countries," Starr reports.

In fact, the ubiquitous Brzezinski apparently "advises" other candidates too, but his office refused to divulge their names, on the grounds that "Mr. Brzezinski's relationships to the candidates are private relationships."

LEVI TO CONGRESS: AUTHORIZE A POLICE STATE

Attorney General Edward Levi this week demanded that Congress legalize FBI COINTELPRO operations directed against political groups and their supporters.

Speaking before the Senate Select Committee on Intelligence the Attorney General and former Nazi collaborator proposed a set of guidelines that would give the FBI the authority to "obstruct or prevent" groups that were plotting to use force or violence "that might pose a threat to life or that would interfere substantially with the essential functioning of the government."

The Levi proposal, which parallels recommendations made last year by the staff of the Rockefeller-controlled Commission on the Organization of Government for the Conduct of Foreign Policy (the Murphy Commission), is a defacto request for blanket authorization of a police state. Even the New York Times was forced to admit that the request was the first time in history that a proposal had been made to permit the FBI to legally act against individuals or groups before a crime is committed.

Despite FBI and Justice Department statements to the contrary, the COINTELPRO type operations of the FBI and related agencies have never been terminated. Such operations, which include the entire deployment of agent-provocateurs, terrorists, assassins, gun and drug runners, etc., are the core of Rockefeller's domestic police state apparatus. As has been documented by the Labor Party in evidence submitted to, among other places, the Senate Select Committee, such Levi-ordered deployments have been escalated in recent weeks against the USLP and its supporters.

Now, in order to carry out Hilex, the entire Levi operation will be put on full mobilization - a fact alluded to FBI director Clarence Kelley's comments about an increase in terrorist activity in a speech on Dec. 4. Levi, in a speech at Columbia University last week, had alluded to similar developments and threatened to turn the country into a police state unless Congress backed-down on its pursuit of a contempt citation against the Secretary of State and the defacto head of the National Security Council, Henry Kissinger. Though Rep. Otis Pike (D-NY) did back down, after reporting that an armtwisting deployment had eroded Congressional support for such a citation, Levi is proceeding to make good his threat anyway.

The Levi request is aimed in part at triggering a "critical choices" type debate around the necessity for maintaining COINTELPRO type operations - specifically to meet a threat from the "subversive"
