

Israeli H-bomb aimed at the EMS

London counters new monetary system with promises of war

With the Jan. 1 deadline for the activation of the European Monetary System but six weeks away, the City of London has activated its last reserve options for an eleventh hour sabotage of the EMS.

In order to engender a new Cuban missile crisis-style thermonuclear showdown between the United States and the Soviet Union in the coming weeks, Great Britain has activated the ultimate threat — an Israeli nuclear strike destroying Persian Gulf oil supplies.

This nuclear strike threat is the unspoken but specific content behind the flood of well-publicized statements issued by official and unofficial representatives of the Royal Institute of International Affairs in the last week that the EMS is a “war issue.”

Israel's nuclear capability and intent are neither fiction nor bluff. Yet Israel's possession of atomic weapons, while true, is in itself only a cover story. What we begin to expose in the following report, and will show in greater detail in our next issue, is the body of evidence proving two interrelated and crucial facts.

First, Israel's actual nuclear strike capability is an *H-bomb* capability. Second, Israel got the H-bomb through a high-level British-Israeli intelligence spy ring that was and is still functioning in the United States.

In good late 1940s prose; “Israel stole the secrets of the Bomb from us.”

The key to Britain's plan to employ the “Israeli card” is the current well-advanced process in the Carter Administration, through which the U.S. is being propelled, through the efforts of British agents of influence who control the National Security Council, into a face-down against the Soviet Union. The latest White House-Administration policy decisions, and press signals now reaching avalanche proportions, provide more than ample documentation that the U.S. ship of state is being steered by Brzezinski, Kissinger, and Schlesinger perilously close to a thermonuclear waterfall. A series of White House decisions which in sum mean that a crisis-threatening rearmament drive is already underway, and sudden press warnings of a new Cuban missile crisis, form an unmistakable pattern.

Several high-level British-Zionist spokesmen have privately remarked of late that “we are prepared to

risk World War III” to sabotage the EMS. It is clear from recent events that they are deadly serious.

The following report bares the H-bomb scandal, then looks behind it: at Carter's war-austerity budget, the EMS's latest affront to London, Europe's reply to U.S. confrontationism, and the war drive in the Mideast.

1. How U.S. traitors gave Israel the H-bomb

Like most major intelligence discoveries, this story began with what seemed to be the tail of a mouse, and ended up hauling in an elephant. A team of U.S. Labor Party investigators, tracking a group of sleazy individuals who used their credentials in the Zionist lobby to set up a phony front organization to promote fusion energy, have uncovered the spy scandal of the century.

What we are previewing here is the astonishing dossier of the nest of traitors who stole America's most fundamental atomic secrets, and gave Israel the capability to manufacture hydrogen bombs. The spy nest centers around the “Nuclear Club of Wall Street,” a “covert” organization by description of its own members. Operating under the cover of partnerships in Wall Street brokerage firms, executive positions in industrial companies, and hole-in-the-wall “scientific” firms scattered through the New York Metropolitan area, members of the Nuclear Club of Wall Street are the core of the atom spy network of Israel's foreign secret intelligence, the Mossad.

These men are the most dangerous traitors in circulation now in the United States. Through their efforts, Israel has the means to provoke a third World War and destroy the United States.

To squelch any frenzied action by the Israelis, namely starting a nuclear war, the U.S. Labor Party executive has issued a call for minimum measures for world security: that the Soviet government insist that a nonnegotiable feature of the current round of Strategic Arms Limitation Talks be the immediate
