

brighter days they may all find employment. This is only another instance of humane civilization going directly against the order of nature and encouraging the survival of the unfit.

The slogan "not more but better Americans" should have its counterpart in every country in the world . . . accompanied by the consciousness that quality rather than quantity is the essential element of progress in every country and in every race.

An idea whose time had come?

Following Osborn's speech, the conference proceeded to unanimously elect Dr. Ernst Rudin as president of the International Federation of Eugenics Organizations. Rudin, employed by the Rockefeller Foundation-funded Kaiser Wilhelm Institute in Munich, was a top race scientist, having co-founded with Dr. Alfred Ploetz the German Society for Racial Hygiene back in 1905. Ernst Rudin was to become the author of Hitler's law "For the Protection of German Blood and German Honor," and made any sexual intercourse between Jews and Aryans a criminal offense. He was also the author of the law "For the Prevention of Hereditary Diseased in Posterity," the law directly on the Eugenics Record Office's Model Eugenic Sterilization Law of 1921, which called for the for-

cible sterilization of the feeble-minded, mental patients, the criminally insane, convicted criminals and "orphans, the homeless, ne'er-do-wells, and tramps"—in other words, any individual whom the Harrimans and their friends pronounced to be genetically undesirable. As the architect of Hitler's and Goering's T4 program, Rudin trained the medical personnel who conducted Nazi Germany's first extermination program, killing 400,000 mental patients. Millions of Jews, Slavs, and others followed.

Rudin's political outlook is summarized concisely enough by the obituary he wrote for his good friend Ploetz in 1940: "It is tragic that Ploetz did not live to see the solution of the problem of understanding and cooperation of the Nordic races, when he had believed so ardently in the purposeful leadership of Adolf Hitler, and his holy, national, and international racial hygienic mission. But let it be a consolation to us that until his last breath he maintained the unshakeable hope of a victory of conquest of the German race and that in the then ensuing peace there would follow a victory in racial hygiene."

This was the man elected by the Harrimans, the DuPonts, the Rockefellers, Morgans, Dodges, and Roosevelts to head their "scientific society." In the name of "living space" and "racial hygiene" 50 million graves had been dug by Averell Harriman, and the rest of the polite, well-dressed folk of the Eastern Establishment.

The origins of the fraudulent IQ test

INFERIOR INTELLIGENCE

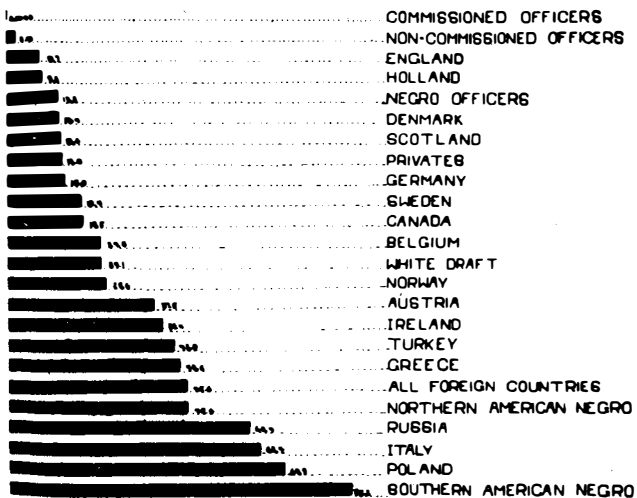

Chart prepared by H. H. Laughlin, Superintendent of the Harrimans' Eugenics Record Office, and presented to Congress on March 8, 1924, to show that non-Nordic immigration would lower the level of intelligence of the American population.

In the first decade of this century, the eugenicist circle around Averell Harriman's mother opened a campaign, which has continued to the present day, for the forced sterilization of America's poor. A high point of this Harriman-centered effort was the 1921 drafting of the Harriman-founded Eugenics Record Office's Model Eugenic Sterilization Law, which called for the forcible sterilization of the feeble-minded, mental patients, the criminally insane, convicted criminals, and "orphans, the homeless, ne'er-do-wells, and tramps." The Record Office model served as the basis for the Nazi forced sterilization laws of a decade and a half later.

How did the Harrimans and their fellow eugenicists propose to determine feeble-mindedness? Eugenics Record Office Director H.H. Laughlin succeeded in getting the fraudulent Stanford-Binet IQ test accepted as a measure for this purpose. This suited the Harrimans' racist and anti-Semitic biases to a tee, as the Stanford-Binet tests was given only in English, and involved numerous "Americana" trivia questions. As a result, over 85 percent of the Russia, Jewish, Polish, Mexican and Italian immigrants who took the test scored in the "moron to imbecile" range. As such, they became candidates for forced sterilization under the Harriman-sponsored laws passed in 30 U.S. states by the end of the 1920's, should they be institutionalized for any reason.
