

adopt, she said, and this means that science and technology must be subjugated to the Judeo-Christian principle of morality that man is made in the image of God.

Because scientists involved in recombinant DNA experiments do not understand this, Mrs. LaRouche said, all genetic manipulation and experimentation with human genetic materials should be banned.

The conference as a whole passed a resolution supporting her viewpoint, which stated that the human embryo should be protected, both from abortion and from this kind of experimentation.

### Treat euthanasia as murder

Not surprisingly, the conference also passed a resolution calling for the extirpation of euthanasia, and penalties against those who are carrying out these "legal" murders. Singled out for particular attention was Dr. Julius Hackethal, the self-promoting killer and proselytizer for killing people. Dr. Hackethal is still able to practice "medicine" in West Germany, despite the fact that he has shown films advertising his methods of killing his patients. Recently, he even admitted to having killed his mother!

The conference demanded that Hackethal's license be revoked, as one step in reversing the process of legalization of euthanasia. Lack of prosecution of the murderers is one of the major boons which the euthanasia perpetrators enjoy.

The conference heard extensive discussion on the euthanasia issue, especially as it is being adopted as social policy toward the elderly and the handicapped.

Two exciting reports were heard on the fight against this policy. Mrs. Bitto, of the Italian Catholic trade union, described her union's campaign against the growing austerity policy which claims there is "too much" medical care for the seriously ill. Dr. Chaovanee Aroonsakul presented her successful treatment of Alzheimer's disease patients with a newly developed hormone therapy which reverses deterioration of patients even in the late stage of the disease, and thus gives the lie to the propaganda campaign that Alzheimer's patients need live "useless" lives.

### Life for life's sake

One of the most powerful speeches came from Don Dario Composta of Italy, former dean of the pontifical Urbaniana University in Rome. Don Dario condemned the new "quality of life" ethic, saying that it was used to attack the value of life itself. The priest's elaboration of the "metaphysical foundations on why euthanasia is unlawful" was endorsed by candidate LaRouche, who spoke right after him.

The conference was also addressed by several medical doctors, including the president of the Union of Medics in Germany. Greetings were received from many more doctors and prominent personalities from all around the world. These included Dr. Andre Wynen, secretary general of the World Medical Association, and Mordecai Piron, Chief Rabbi of Zurich, Switzerland.
