### *Defend Our Presidency from London!*

Six weeks into the Obama Administration, one thing is crystal clear: The British Empire, and its appendages on Wall Street and in U.S. political institutions, are totally committed to the destruction of the new Presidency, and the United States as well. As Lyndon LaRouche put it on March 7, it's time we American patriots stopped denying reality and mobilized to defend ourselves, by going on a war footing.

LaRouche said: "We are presently in a state of war. It's a war against the British Empire. The United States' existence is being attacked by the British Empire, and we have this crazy fascist, former Prime Minister of Britain Tony Blair coming in, and brainwashing a bunch of not only our citizens, but some of our members of Congress.

"So, now we're out to win war! And everything we do, every day, is to mobilize in the morning: You know, at Reveille, you're going to get up, and you're going to start fighting war! And some of the people will start fighting the war before Reveille, just to get things moving. We're out there for a war against the modern equivalent of the Liberty League, the bunch of traitors, the bunch of Fascists whom we fought in the 1930s, in the form of the Liberty League, which now represent the crowd behind Gingrich and so forth, today. So we're going to fight that war, and we're going to win it: That's our major objective."

There are many fronts to this war. While the major concentration by the British and their assets is to prevent the implementation of an FDR-style bankruptcy reorganization, the entire Imperial apparatus, from Prince Charles on down, has also gone into high gear on the so-called environmentalist front, with the "climate change" hoax. Baby

Boomers, and even younger generations, are totally vulnerable on this point, but the point has to be made ruthlessly: Prince Charles, like his father Philip, and Tony Blair are full-fledged fascists, explicitly committed, in the case of the Royals, to the reduction of the human population by billions of people. They are either stopped—or civilization itself will be destroyed.

It is a sad fact that only LaRouche and his movement are prepared to lead this war against the British Empire. This has been the reality for 40 years, and our British enemy knows it well. For what other reason would they have mobilized their assets in the United States, to spend billions of dollars to defame and frame up LaRouche, in hopes of eliminating his influence with the nation's patriotic institutions?

LaRouche and his movement have played a pivotal role in defending the United States, despite the British assault on him. Most crucial were LaRouche's initiation of Reagan's Strategic Defense Initiative policy, and the vigorous campaign to "Defend the Presidency," during the unconstitutional attempt to bring down President Bill Clinton. Yet, disastrously, the central thrust of LaRouche's policy alternative—the return to an American System economic policy, based on the physical economic principles mandated by our Constitutional commitment to scientific progress—has not yet been taken up.

But now the decisive moment has arrived. We're faced with a total disintegration of our financial and economic systems, and outright fascist destruction of our institutions. We have to focus on the real enemy—and drive forward for the solution which will destroy him. Tune into LaRouche's March 21st webcast, and muster up!
