

The elites of the high-risk group countries are working very hard not to depart from the world scene as nonentities held in contempt by all. *The financial oligarchy of Britain and the U.S.A. is currently the highest threat to civilization.* The scenario of a controlled hyperinflation of the dollar is the most favorable for those groups, since it would allow them to avoid nationalization and to concentrate a maximum share of real assets in their hands.

The financial oligarchy's ideal Operation Barbarossa looks like this: hyperinflation of the dollar, introduction of dictatorship in the U.S.A., enslavement of neighboring countries (Canada, Central and South America), chaos throughout the rest of the planet, inducing rivals to do themselves in, if possible, and a replay of the Marshall Plan for the purpose of achieving control over those who survive. The global chaos will allow them to stake a claim to hold on to their power,

despite what happens in the U.S.A., because the majority of the planet will be in even worse shape.

*Special attention should be paid to the Middle East, which serves as the "battery" of the Eurasian economy. A blow-up in the Middle East will plunge most of Eurasia into chaos.*

This means no future. It is the most likely course of events. There are others. But what can be said with certainty is that the Autumn carnival called "Financial Globalization" is coming to an end, and the planet is on the threshold of a severe Winter.

Thank you for your attention.

## LaRouche Replies: One Crucial Error

July 14, 2010

TO: ALEXSWORD

The entire report, "Endgame for Financial Globalization," fails on only one crucial account; it draws mistaken conclusions respecting the effects of the present world crisis, by accepting the currently prevalent, international presumption respecting the role of money as such. Specifically, most of the current financial accounts of nations and governments depend upon the presumption that money, as presently defined, represents economic value. Whereas, in fact, since August 1971, the introduction of financial derivatives launched under U.S. Federal Reserve Chairman Alan Greenspan, created an implicitly hyperinflationary global effect by unleashing a flood of worthless financial capital, called financial derivatives, which now vastly exceeds money circulating within the physical economy, that by orders of magnitude, by the accelerating hyperinflationary ratio of mere financial speculation

to the throughput of the physical economy.

What occurred, exactly as I had warned in a July 25, 2007 webcast, has been a planet-wide general breakdown-crisis of the planet as a whole.

Thus, without the urgently needed, immediate expulsion of U.S. President Obama from the U.S. Presidency, there is no chance that any part of the world economy and social order will outlive the continuing chain-reaction steps of collapse, marching down the steps of Odessa—step by step—as in the Russian soldiers in *The Battleship Potemkin*.

We are currently crafting a tensor model of the type of our model of Gauss's defining of the orbit of Ceres, to show the actual essentials of the currently onrushing breakdown-crisis of the U.S.A. The breakdown of the U.S. economy would launch an immediate breakdown-crisis of the entirety of the Trans-Atlantic world, and the ensuing collapse of the Trans-Atlantic world would generate a breakdown-crisis throughout the Trans-Pacific sector of the world.

The stipulations we are employing are identical in form with the 11-minute video treatment of this determination of the Ceres orbit on my LPAC website.
