

TAVISTOCK TERROR PLAYS IN SWEDEN

May 24 (IPS)— The CIA's international terrorist network is now being activated in Sweden, one of the counterinsurgent Tavistock Institute's principal laboratory countries. May 20, a young man carrying a machine gun held five women hostage in a Gothenburg pharmacy. The kidnapper demanded the release of three people he met while a prisoner at Kumla prison near Norrköping. Kumla is an internationally known behavior-modification brainwashing center after which Rome's notorious terrorist factory, Rebibbia prison, was modelled.

The Gothenburg gunman is calling for the release, not of political prisoners, but of a very special trio of criminals. Two of the three are Clark Olofsson and Janne Olsson, the terrorists who gripped all of Sweden in fearful hysteria for six days last August with their occupation of the Kreditbanken in Stockholm. The third is Karl Paucksch, so-called "king of hallucinogens" and narcotics underworld terrorist. (Two months ago the Swedish ambassador to the Hague was supposed to have been kidnapped to ransom Paucksch.) The demand for their release has plunged the population into the terror of last summer. (A Gothenburg University professor commented this March that the bank "drama" caused Swedes to forget the rest of the world for an entire week of hysterical fixation!)

Press Fans The Terror

The Swedish press has obsessively played up the connection between the Gothenburg incident and the bank hold-up. The May 21 issues of *Svenska Dagbladet* (Stockholm), *Dagens Nyheter* (Stockholm), and *Arbetet* (Malmö) all feature articles and photographs of the Stockholm robbery next to coverage of the Gothenburg kidnapping. Headlines screamed: "Desperado in Drugstore— Release Clark Olofsson and Janne Olsson!", "Drama in Gothenburg: Women in Drugstore Pistolman's Hostage," "Drugstore Drama: Here is Whole Drama/ MINUTE FOR MINUTE...."

Simultaneously *Arbetet* reported that Swedish TV in Gothenburg was awaiting directives from Stockholm, "lying low because of criticism of the most massive TV coverage in Swedish history of the August bank terror." May 21 another bank episode occurred in Stockholm, culminating in a shoot-out with grinning police.

Swedish Minister of Justice Lennart Geijer, who played a featured public role in the August incident, "coincidentally" was staying in Gothenburg studying the organizing of Gothenburg neighborhood block police. Geijer quickly moved to legitimize the kidnapping as psychologically manipulate the public around increasing terrorism.

IPS Intelligence personnel are investigating further links between Swedish CIA terrorism and the rampant terror tactics of CIA countergangs internationally.

TERRORISM SPECIALISTS MAKE ANTI-TERRORIST PLANS

May 24 (IPS) — Radio Canada announced the formation of a U.S.-Canadian task force for the 1976 Olympic Games in Canada. According to information from Kissinger aide Lewis Hofbacker, the task force is geared to anti-terrorist planning. Costing \$15 million, the task force consists of members from the CIA, FBI, Royal Canadian Mounted Police, and Quebec Police; and it will be beefed up by an additional 7,000 Canadian soldiers stationed at Longue-Pointe.

Meanwhile, 250 policemen from the U.S. and Canada met in closed session this week in Toronto. The group, known as the Law Enforcement Intelligence Unit, is meeting for the first time in its 19 years of existence!

ISRAELI SHIN BETH STAGES BLOODBATH TO SABOTAGE NEGOTIATIONS

May 24 (IPS)— The May 15 bloodbath-murder of 24 Israeli children and three Arab terrorists in Maalot, and the follow-up of two days of bombing by Israeli Phantom jets over heavily populated Palestinian refugee camps was a planned and orchestrated attempt by the Israeli Intelligence Service, Shin Beth. It was staged by this hardline faction of Israeli ruling circles to sabotage reported "breakthroughs" in Kissinger-Israel-Syria negotiations to reorganize the Middle East along Rockefeller's lines. The violent plan was carried out in order to split the population up further by creating an atmosphere of rage, shock, and hysteria around the stepped-up terrorist activities; to help coalesce the emerging but fragmented groupings around the program of "more police protection" and to provoke a massive outpouring of anti-Zionist feeling among Arabs.

All evidence shows that the group associated with the fanatic terrorists, the Popular Democratic Front for the Liberation of Palestine (PDFLP) was either controlled or manipulated by the Shin Beth. During the Jordanian Civil War in September 1970, the PDFLP maintained a public position opposed to terrorism and showed signs of becoming a self-conscious socialist movement on the verge of breaking out of the parochial "Palestine Revolution" movement. This made it a prime target of the U.S. Central Intelligence Agency, Shin Beth, and Jordanian and Egyptian intelligence units, which create and play upon parochial groupings in order to destroy international socialist movements.

Terrorist Former Israeli Prisoner

The three terrorists were said to have entered Israel through the North, an area which two weeks previously had set up extremely tight security. This makes it unlikely that the terrorists could have entered Israel without Israeli complicity. Further, the guerrillas were Israeli Arabs, one having spent years in an Israeli prison. It is common practice of the CIA and its allied intelligence agencies internationally to brainwash such captives and turn them into zombie agents to infiltrate organizations like the PDFLP. These Arab guerrillas would have been ideal victims for such brainwashing and infiltration by the Shin Beth.

The IPS Intelligence staff is researching the Shin Beth's activities, and further reports will appear in future issues of IPS.

WILDCAT CREATES "NEW IMAGE" IN GARMENT CENTER: NEIGHBORHOOD GESTAPO

May 24 (IPS) — Vera Institute, leading counterinsurgent planning agency in New York City is expanding Wildcat Services, an experimental program which hires and trains former addicts and offenders for cut-rate jobs.

The new 12-week pilot program will have 18 trainees man an information booth, maintain "new wire mesh trash baskets," in the Westside Garment Center area, sweep sidewalks and "work with police on several crime prevention programs." Plans call for trainees to aid the Midtown police precinct in "Operation Identification" and "blockwatcher programs."

Mayor Beame heartily approves of the \$36,000 Wildcat Program to institute Nazi-style clean-up and policing in the Garment Center. "Wildcat Services has a proven track record in working with the Police and Sanitation Departments," he said.

Other Wildcat programs employed methadone addicts to clean the outsides of public buildings for half the pay of unionized maintenance men.
