

Jhonny Estor

Greetings to the Schiller Institute and Distinguished Guests

This is the edited transcription of a video greeting received from Jhonny Estor, founder of Renaissance Haiti, delivered during Panel 2, “The Science of Physical Economy,” of the Schiller Institute’s Nov. 13-14 Conference, “All Moral Resources of Humanity Have To Be Called Up: Mankind Must Be the Immortal Species!”

I am Jhonny Estor, founder of Renaissance Haiti, from the Caribbean nation of Haiti.

It is heartwarming to become an associate of the LaRouche movement, whose objectives to champion the rights and needs of all people resonate with me personally and with the work of Renaissance Haiti.

My concern to rescue and develop Haiti, my homeland, brings me into contact with you.

Perhaps, our Creator blessed me to have, at an early age, interest and to study the building of Europe’s railroads, especially those of Russia. As an adult, I have

Schiller Institute

Jhonny Estor

drawn upon this knowledge in drafting my reconstruction design for a modern Haiti.

Eighty percent of my people, in Haiti, depend on the informal economy, which has collapsed, for making a living. They are without health care, without clean water, without modern power. The places and faces of millions of people set to perish unnecessarily in Haiti, and many other nations, from disease, starvation, and neglect may seem strange, very far away, and unreal to many of you. Imagine what would you do, if these

were your children, if these were loved ones of yours?

This situation is very, very real and entirely unnecessary.

I think the reconstruction plans of the Schiller Institute and Renaissance Haiti go hand in hand.

I look forward to an opportunity to elaborate more on this in the near future. Thank you.

Dr. Joycelyn Elders

The Urgent Need for a World Health System— Not to Care Is Unforgiveable

This is the edited transcription of the presentation by Dr. Joycelyn Elders to Panel 2, “The Science of Physical Economy,” of the Schiller Institute’s Nov. 13-14 Conference, “All Moral Resources of Humanity Have To Be Called Up: Mankind Must Be the Immortal Species!” Dr. Elders is the former Surgeon General of the United States.

Good afternoon! Greetings to Helga and all of you assembled internationally for this conference of the Schiller Institute on the theme “All Moral Resources of Humanity Have to Be Called Up.”

Schiller Institute

Dr. Joycelyn Elders

Last year, as the pandemic was beginning, I was called on by Helga [Zepp-LaRouche] and others to help initiate the Committee for the Coincidence of Opposites to address not simply the COVID crisis, but the broader crisis of the lack of a full, modern health care system accessible to everyone in the U.S., and everyone worldwide. I and others in the Committee have emphasized that food, clean and safe water, electricity, decent housing, sanitation, roads, and other infrastructure are

as much a part of good health care as hospitals, medical personnel, and medicine.
