

Carlos Gallardo

Greetings From the Christian Democratic Party of Peru

The Christian Democratic Party of Peru salutes the enormous effort of the Schiller Institute and its President, Helga Zepp-LaRouche, in courageously publicizing the reality of the danger of humanity being subjected to a new world order, which manifests itself as a new form of imperialism, no longer one of one state against others, but of the large, multitrillion-dollar corporations, controllers of science and technology, including space technology, over the whole world.

Peace, we believe, should be based not on terror

and fear of the strongest, nor on the threat of death, but rather, should be understood as a community, belonging to a civilization which understands that only by recognizing the human being as the prince of creation, endowed with spiritual qualities and human dignity, will humanity be able to establish pathways to opportunities for solidarity, progress and universal Common Good.

A fraternal embrace,

Carlos Gallardo,

President of the Christian Democratic Party of Peru

Second Discussion Session

The following are edited excerpts from the second discussion session, November 13, 2021, during Panel 2, “The Science of Physical Economy,” of the Schiller Institute conference, “All Moral Resources of Humanity Have to Be Called Up: Mankind Must Be the Immortal Species!” The discussion involved two co-moderators, Claudio Celani, from Wiesbaden, Germany, and Dennis Speed from New York City. The panelists participating in the discussion were Dr. Joycelyn Elders, Dr. Walter Faggett, Major General (ret.) Carroll D. Childers, Eric Walcott, Jhonny Estor, and Richard Freeman, co-author of “The Schiller Institute Plan to Develop Haiti,” who gave a special presentation on this during the discussion. The [Plan](#) was published in the October 1, 2021 EIR.

Mozambique Initiative

Dennis Speed: Dr. Faggett, you have a message from Dr. Khadijah Lang concerning the Mozambique initiative?

Dr. Walter Faggett: I’m here in Washington D.C. I just want to confirm, as Dr. Elders mentioned before, that the Committee for the Coincidence of Opposites is indeed sending supplies to Mozambique. Medicine, medical supplies, water purification, as well as a cash donation for the World Food Program in Maputo, Mozambique. This will be used to purchase and distribute

needed supplies to the Cabo Delgado area, where there are nearly one million displaced and food insecure, starving people.

This project was urged and spearheaded by Committee member Dr. Khadijah Lang, who is not available today. She chairs the Council on International Affairs of the NMA (National Medical Association), whom Dr. Elders previously mentioned. She’s also President of the California branch of the National Medical Association (Golden State Medical Association). She has led several medical missions to Mozambique previously. This was designed both to provide care as well as to train some of the physicians there in Mozambique. It’s an ongoing relationship which will include bringing medical students to work with potentially young folks interested in health careers.

Scores of individuals from several nations have contributed to this combined effort. Hopefully, we think this modest effort to aid Mozambique can serve as a model of cooperation to accomplish the much-needed solutions to the health and famine crises that we discussed here at the conference today.

Claudio Celani: I have two questions for you, Dr. Elders:

The first question is, “I would like to know if your experience of health aid in Mozambique can be done in other countries, like West Africa?” The gentleman who
